

# TURBOCHARGERS

SERIES 60®

 MAINTENANCE

## FEATURES AND BENEFITS

Turbochargers are extremely complex assemblies that are vital to engine performance, fuel economy, and emissions compliance. With internal components rotating at speeds up to 120,000 RPM they are also safety critical. Detroit™ Reman combines 30 years of experience along with OEM expertise to provide a high quality Turbocharger that can be trusted to restore power at a lower cost.

- **INSPECTION:** Every Turbo is completely disassembled and closely inspected for wear.
- **RECOVERY:** Components designated for recovery are restored to original OEM specification.
- **REPLACEMENT:** All wearable components are replaced with new.
- **MATERIALS:** All parts meet strict metallurgical criteria designed for durability and strength.
- **QUALITY:** Produced with care by skilled operators in an ISO9001 certified facility.
- **BALANCING:** All assemblies are balanced to OEM specification on high-speed balancers.
- **HOT GAS TESTING:** Air pressure, flow, and temperatures are verified to match OEM performance.
- **PRECISION:** OEM machining tolerances are upheld with precise accuracy; measured in microns.
- **AVAILABILITY:** Proudly Remanufactured in the USA and available at over 800 locations.
