## ABS/Trailer Stability - Bendix® TABS6 Trailer Roll Stability (TRSP)

Safety

Lower Cost of Ownership

Roll-overs

BENDIX MANUFACTURER'S WEBSITE ([https://www.bendix.com/en/products/airtreatment/airtreatment\\_1.jsp](https://www.bendix.com/en/products/airtreatment/airtreatment_1.jsp))

### Product Highlights

Lowers TCO with robust design features

Helps reduce the risk of trailer roll-overs

Helps driver maintain control

### Top Movers - ABS Trailer

Part Number	Part Description	Model Number	Rank By Units	Rank By Sales

## General Product Information

### Bendix® TABS6 ABS

Product	Description
Standard ABS	2S/1M Basic ABS system required by law
Premium ABS	2S/1M through 4S/3M ABS
Single Channel Trailer Roll Stability	2S/1M ABS w/Integral Trailer Roll Stability Program (TRSP) for single or multiple trailer applications
Multi-Channel Trailer Roll Stability	2S/2M & 4S/2M ABS w/Integral Trailer Roll Stability Program (TRSP) for single or multiple trailer applications

### Bendix® TABS6 Trailer ABS

Features	Benefits
Mechatronic Design	No external cables connecting ECU to Modulator – Eliminates common failure point
Integral & Protected Connectors	5 Pin industry standard connector – No need for additional power pigtail (Standard ABS) Power and Speed sensor connections protected by lockable splash cover – all connections vertical to reduced likelihood of corrosion Tank or Frame Mountable– 4.75" Installation Swing Radius
Small Package/Simplified Installation	4.2 lbs One supply port connection – additional plug not required Installation requires no bending of speed sensor harness and power harness Remote mount modulator – ideal for spread axle trailers with separate tanks and Canadian applications with more than 3 axles
Retrofit capabilities	Multiple Kits combinations available for both Bendix or Competitive ABS Retrofits Simple to initiate 2-digit blink-code diagnostics – No tools required
Simple Diagnostics	Remote J1587 diagnostic cable available Supported by Bendix ACOM Diagnostics
Flexible Features	Auxiliary Design Language (ADL) Up to eight (8) auxiliary pins available (Premium ABS) for added functionality
Data & Communications	Odometer mileage, trip and service intervals, trailer VIN via PLC

### Bendix® TABS6 Trailer Roll Stability (TRSP)

Bendix® TABS6 Advanced functionality applies pressure to the trailer brakes to reduce vehicle speed and mitigate the tendency of the vehicle to roll over.

Situation	Example Description	How TRSP Helps
Roll-Over	Exiting Highway or entering a curve turning too fast	When that occurs, the system automatically intervenes when it sees lateral acceleration building. The system pulses the brakes to detect wheel lock and then applying brakes to slow the vehicle and help mitigate a potential rollover
	Swerving to avoid an object in your lane	When that occurs, the system automatically intervenes based on the quick change in lateral acceleration it sees and immediately applies the trailer brakes to slow the vehicle and help mitigate a potential rollover.
Aggressive Driving	Perceived risk of roll-over is high	Integrates with SafetyDirect or other telematics systems to wirelessly notify the fleet
