Dash Cameras

Pana-Pacific Website (<http://www.panapacific.com/category/truck-components/dash-cameras>)

Product Highlights

Dash Cameras

Onboard camera(s) that continuously records the view through a vehicle's windshield and/or inside the cabin. Dash cameras may provide video evidence in the event of a road accident. During parking, some dash cameras can capture video evidence if vandalism or theft is detected in response to motion. Dash cameras are equipped with removable SD cards for event data storage and review. Some dash cameras are GPS enabled to add additional information about the location of a vehicle during recorded events.

Event Data Recorders

By simultaneously recording multiple camera angles, and Event Data Recorder (EDR) can provide irrefutable evidence in the case of an incident. EDRs are equipped with memory cards to capture and store events triggered automatically by G-force and/or manually by the driver. Content retrieval methods range from removing the camera's SD card, to automatically transmitting using Wi-Fi or cellular connectivity.

General Product Information - Cobra

Cobra's range of dash mounted cameras include models with the following features:

The Perfect Eyewitness

The road can be a crazy place. A dash camera can provide protection in the case of accidents, insurance fraud, distracted drivers, and road rage. The Cobra HD Dash Cams continuously record the road ahead so that factual evidence is available in the case of an incident. A dual camera setup will provide complete coverage of the road ahead as well as recordings of what takes place simultaneously inside the cab (resolution is modified to 1080P Front, 720P Rear when operating in dual mode).

Super HD Video

Super HD Video enables crystal clear recording in both daylight and nighttime conditions. Whether for a traffic incident, spectacular road trip, or mundane commute, Drive HD captures all of the details.

iRadar Route Tracking

Embeds location, speed, and G-Sensor information at every point of the route when connected to the iRadar App.

iRadar Camera + Live Police Alerts

Provides real-time threat information from the millions of iRadar® users on the road. Alerts to Red Light Cameras, Speed Cameras, and Live Police Locations.

Automatic Operation

Loop Recording continuously records the road ahead during the drive. G-Sensor detects impacts and automatically protects surrounding footage. Parking Mode records when motion is detected.

Extreme Temp Protection

Built with supercapacitor technology to withstand the extreme temperatures in the vehicle. This dash cam is battle-tested for reliable performance in the most frigid cold snaps or punishing heat waves.

Advanced Driver Alert System

Distracted driving is more prevalent than ever. Lane Departure and Forward Collision Warnings let drivers know if they are drifting out of the lane or quickly approaching an object in front of the vehicle.

Easy to Use

Simple and intuitive operation. Automatic recording and shutdown lets drivers set it, and forget it.

Ready-to-Go

Includes Camera(s), Micro SD Card, Low Profile Adhesive Mount, and Vehicle Power Adapter. Simply Mount, Power, and Drive!

General Product Information - Omnitrac's CEV

Features & Benefits of the Critical Event Video solution:

- Fully integrated video solution leveraging existing communication plans, familiar Omnitrac's applications, and proven infrastructure providing benefits at a realistic cost
- Forward-facing camera that is continuously recording
- Optional inward-facing camera that automatically turns off when not in use to ensure driver's privacy
- Video that is available within minutes of the triggered event, or on-demand request
- DVR functionality, which allows fleets to request video for a specific date and time
- Prequel and Sequel functions allowing fleets to add clips before and after any existing clip to build a complete reconstructed timeline
- Extremely configurable - you decide:
 - what types of events trigger video
 - how much video to include with each event, and how long it should be preserved
 - which users have what type of viewing access
 - whether or not to add driver-facing cameras, or install now and activate later
- Include audio with each video, or elect to leave it off entirely
- Secured video access and precise preservation
- Low-cost camera hardware that is simple to install
- Trigger events using the Critical Event Recorder application via the ELD unit (i.e. when harsh braking occurs)
- Access all content from the same portal where compliance data is housed

Warranty Information

Cobra Warranty

- Cobra warranty coverage is 1 year

Omnitrac's Warranty

- Omnitrac's warranty coverage is 1 year
