## **Product Highlights**

Highest torque rating - Over 5,000 in/lbs of torque to handle nearly any size fan.

Fail-safe design prevents on-the-road failures - Fan clutch automatically engages when it nears the end of its life.

Fewer individual components means less time to install.

High quality internal components for long lifespan.

## General Product Information

The key reason for premature spring-engaged fan clutch failures is ***lack of torque***. There are fan blades in operation today that require more torque than current fan clutches can produce. Our spring-engaged rebuild kit is unmatched by any competitors (new or re-manufactured) & packs over **5,000 inch-pounds of torque!**

### Highest Torque Rating

Sustaining fan blade engagement requires a large amount of torque. With over 5,000 inch-pounds of torque, our fan clutch will handle nearly all fan blades!

### Less Time To Install

Our exclusive design combines nine separate components into **one final assembly** – this dramatically reduces installation time and installation errors.

### Fail-Safe Design

Our innovative design will AUTOMATICALLY ENGAGE fan clutches when the friction material nears the end of its life.

## Warranty Information

**300,000 mile/3 year warranty**
